

LEATHER CLEANER

Application and Specifications

Application

Before use shake the bottle very well. Before we start cleaning the leather you have to make sure that your leather is free of any sand or debris so make sure it's pretty well vacuumed. Use the pump to get some foam on your brush and agitate the leather in a circular motion to loosen up to dirt. After that give it a wipe down with the microfiber towel.

Specifications

Packaging	200 mL
Appearance	Colorless liquid
Density @23°C	1.06 g/cm ³
pH	10-10.5
Consumption per Unit Area	50 ml/m ²
